Even after you switch the app back to desktop editing, changes are stored. Navigating the document from desktop to iOS in one window and out in the other is easy, too. While most of the new features work in full Photoshop, others are limited to the iPad apps. One of the biggest downsides of Apple's version of Photoshop is the tablet-specific features like Screen Scale, which enlarges or shrinks the iPad Pro screen without relative proportions changing; Auto Frame, which resizes the canvas in the Elements workflow (of course, it's only enabled on the iPad Pro); or Snapseed, a. So, although Photoshop is better on the iPad Pro, its features like Content Aware Fill don't scale well. In any case, the iPad Pro is an improved dev tablet, not a replacement for Photoshop.
