Maine Tujhe Dekha Haste Hue Gallon Main Ali Zafar Maine Tujhe Dekha Haste Hue Gallon Main Ali Zafar Vishal Verma, 29, a graduate of the journalism programme at the Ram Manohar Lohia National Law University, has been caught red-handed for the extortion racket. You have viewed this item, .1. Field of the Invention This invention relates to a measuring device for a levelling of a machine in which a rotatable measuring member is brought into contact with a supporting surface of the machine to measure a level. 2. Description of the Prior Art Numerous measures for the levelling of machines, for example turbines, have already been proposed. In many of these measures, both the turbine and the support surface are or are not planar. When this is the case, a plane indicator is required to be moved transversely to the axis of the turbine so as to allow levelling adjustments to be made in the course of operation of the turbine. The indicator is usually supported by a lever, such as a cranked lever. The cranked lever must be very precisely machined since small deviations from a regular position result in a large deviation of the actual operating position of the indicator relative to the support surface for the turbine. Here, the measuring members which are in contact with the support surface have a contact surface of a size corresponding to the extent of the deviation of the plane with respect to the plane of the support surface. A measuring device which uses the above described cranked lever as the measuring member is described in the German Offenlegungsschrift Nos. 2,337,837 and 2,752,360, for example. In both measures, the contact surface of the measuring member is circular and is arranged in an opening provided in a shaft which
